## Doors to our Lives

I'm always amazed at what a new door can do. It introduces your home, your life and exactly who you are. Does it say fun or classic? Formal or opulent? Live life as you see fit. A door expresses who you are and celebrates your style. Don't underestimate the entry to your world. Invite an open greeting with the front door, and express your welcome voice.

## Bright Love

Bathrooms come in all shapes and sizes. The hot trend is still white for bathrooms. Shades of white are sparkly clean, reflecting sunshine, leaving a feeling of rejuvenation. This virgin canvas can be accented with a splash of color. Everyone feels healthy and happy to recast their morning with a little brightness.

## Beach it Up!

There is something mystical and revitalizing about the beach. Maybe it's just me, but I breathe better here. Sun, play, sand, and swim. Relaxing, balmy vacations come to mind! Create your getaway in the everyday! Remodel your dreams into reality and express the feelings of what you love and places that inspire you!

## Bath Texture

Multiple textures are key to creating interesting spaces. Brighten up the dark old baths of the 70's and 80's.

Some bits of shiny, some wood grain and a portion of matte finishes blend for an outstanding refreshed bathroom of new colors and shapes. Liven up the cracked tiles with quartz counters, remove the old outdated tub and construct a dramatic shower for your guest bathroom. Finish it off with a furniture-style vanity that screams classy. You deserve to live in beauty that inspires you every day.

## Light yourself Up!

Lighting is a key component in our home's personality. It speaks volumes, creating mood and ambiance. When there's great light in your bathroom life feels better, more in control, illuminating what's important-you!

You can see yourself clearly - the details of beauty appear! You are truly gorgeous! To renovate with ease, always think ahead with your lighting needs Ms. Woman builder.

## Simplify to Magnify

To clean out and reduce our overly cluttered world requires evaluating what's important. It starts right here in your home. Don't be afraid to get your bathroom up to date and refreshed. Simple beautiful lines, clean design, crisp fresh visions for our first morning feeling of clarity and vigor to go forth wildly energetic with your day!

## My favorite Tools

The featured tool this month is the sawzall. I'm crazy for this lime green demo cordless small machine. It's my muscle and brawn when I'm out of gas. It can cut through anything! (With the right blade of course). It's a must-have for some healthy DIY demolition ladies. The sawmill is so easy to handle and not too heavy, getting the teardown done in no time flat! "Even" a woman can handle this tool! No guy needed.

## What makes you Happy?

I'll tell you what makes me and most others happy...it's freedom. Freedom to create the home you love with the family you love, and give back to others through appreciation and gratitude. Lastly it's to make a difference in this world! Now let's go out and embrace the change of renovation and renewal so that we LOVE the home we live in!
